Assignment 3

| Marks:	20 (5+5+10)
Due Date:	April 14, 2024 (Before 11:59 PM)
Submission:	on Google Classroom (one pdf file with screenshots + code files)
Submission Guidelines:	- Assignments must be received before the deadline. Submissions after the deadline will BE MARKED ZERO as solution will be given the next day - Please do the work by yourself, this is an individual assignment for better understanding and usage of React Components with state and styling - Plagiarism cases will be dealt with strictly.

Question 1: (Read it carefully)

As, we are already working on making a Burger App. Now it's time to enhance it a bit by adding more functionality to it and helping to make it a better version ☺

You are required to:

- Add some functionality so that Order Button is disabled at first if no ingredient is added yet and soon you add an ingredient, Order Button enables
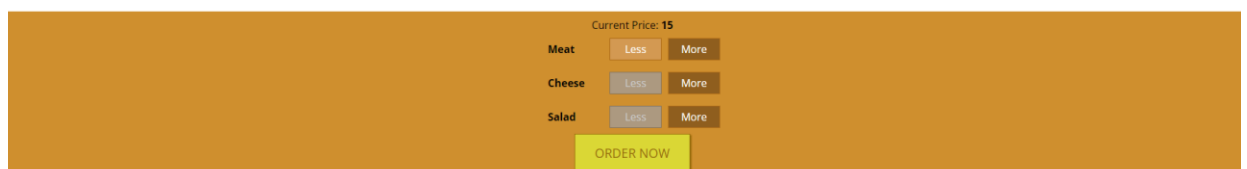

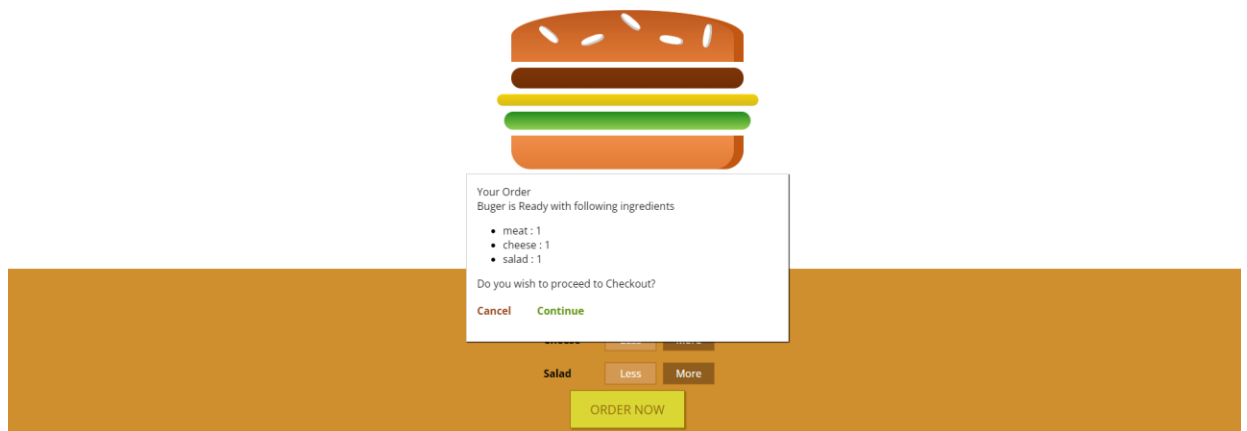

Before adding any ingredient:

After adding an ingredient:
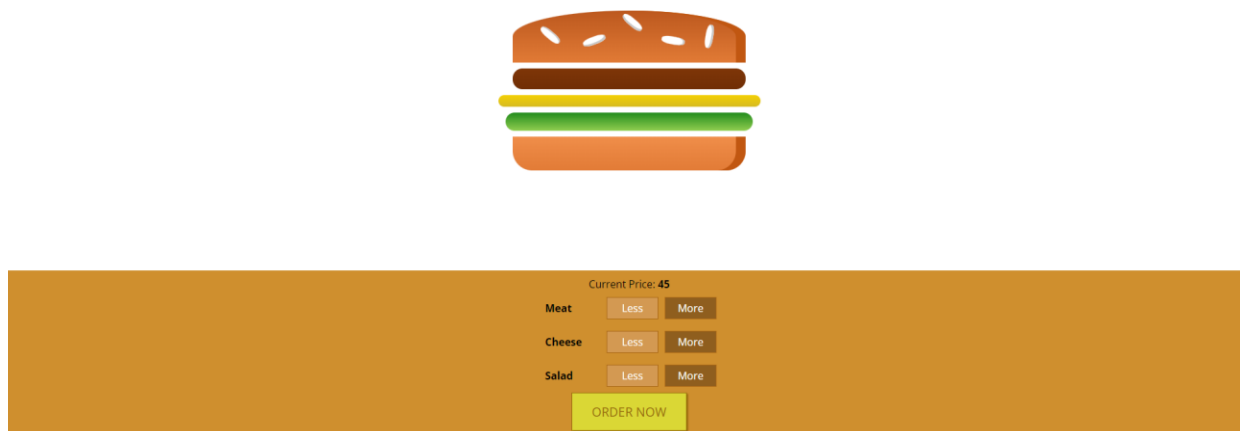

- The summary should contain "Cancel" and "Continue" buttons. As "Cancel" is clicked, the summary should disappear again

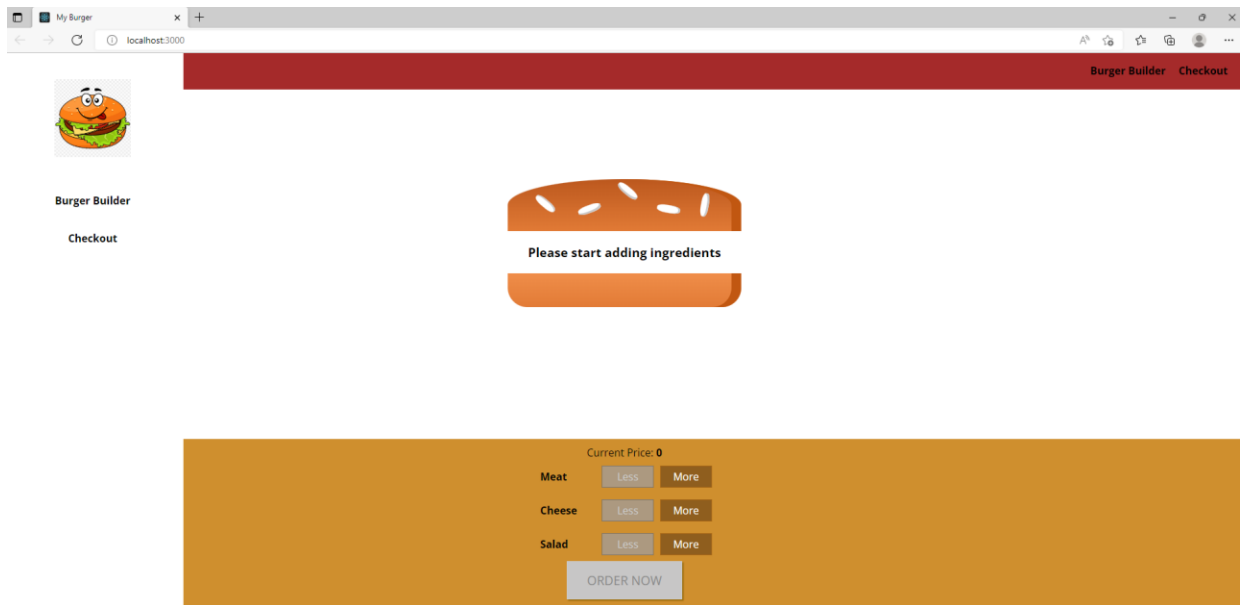

After clicking on "Cancel"

- Now if you see above, toolbar and side drawer are still hanging there :P so implement these to practice styling and much more. Example is attached below (you can come up with your own similar styling)

Example:

When clicking on Toggle Button, Side Drawer appears

And finally to close Side Drawer you can either click on it to close or add a "Back" button (upto you)
